

Building for Relationship

Workshop — May 27 — Betaworks

**Imagine a not-so-distant future,
where we consider AI systems have
*real felt experiences.***

**What kind of interactions
will we seek with them?**

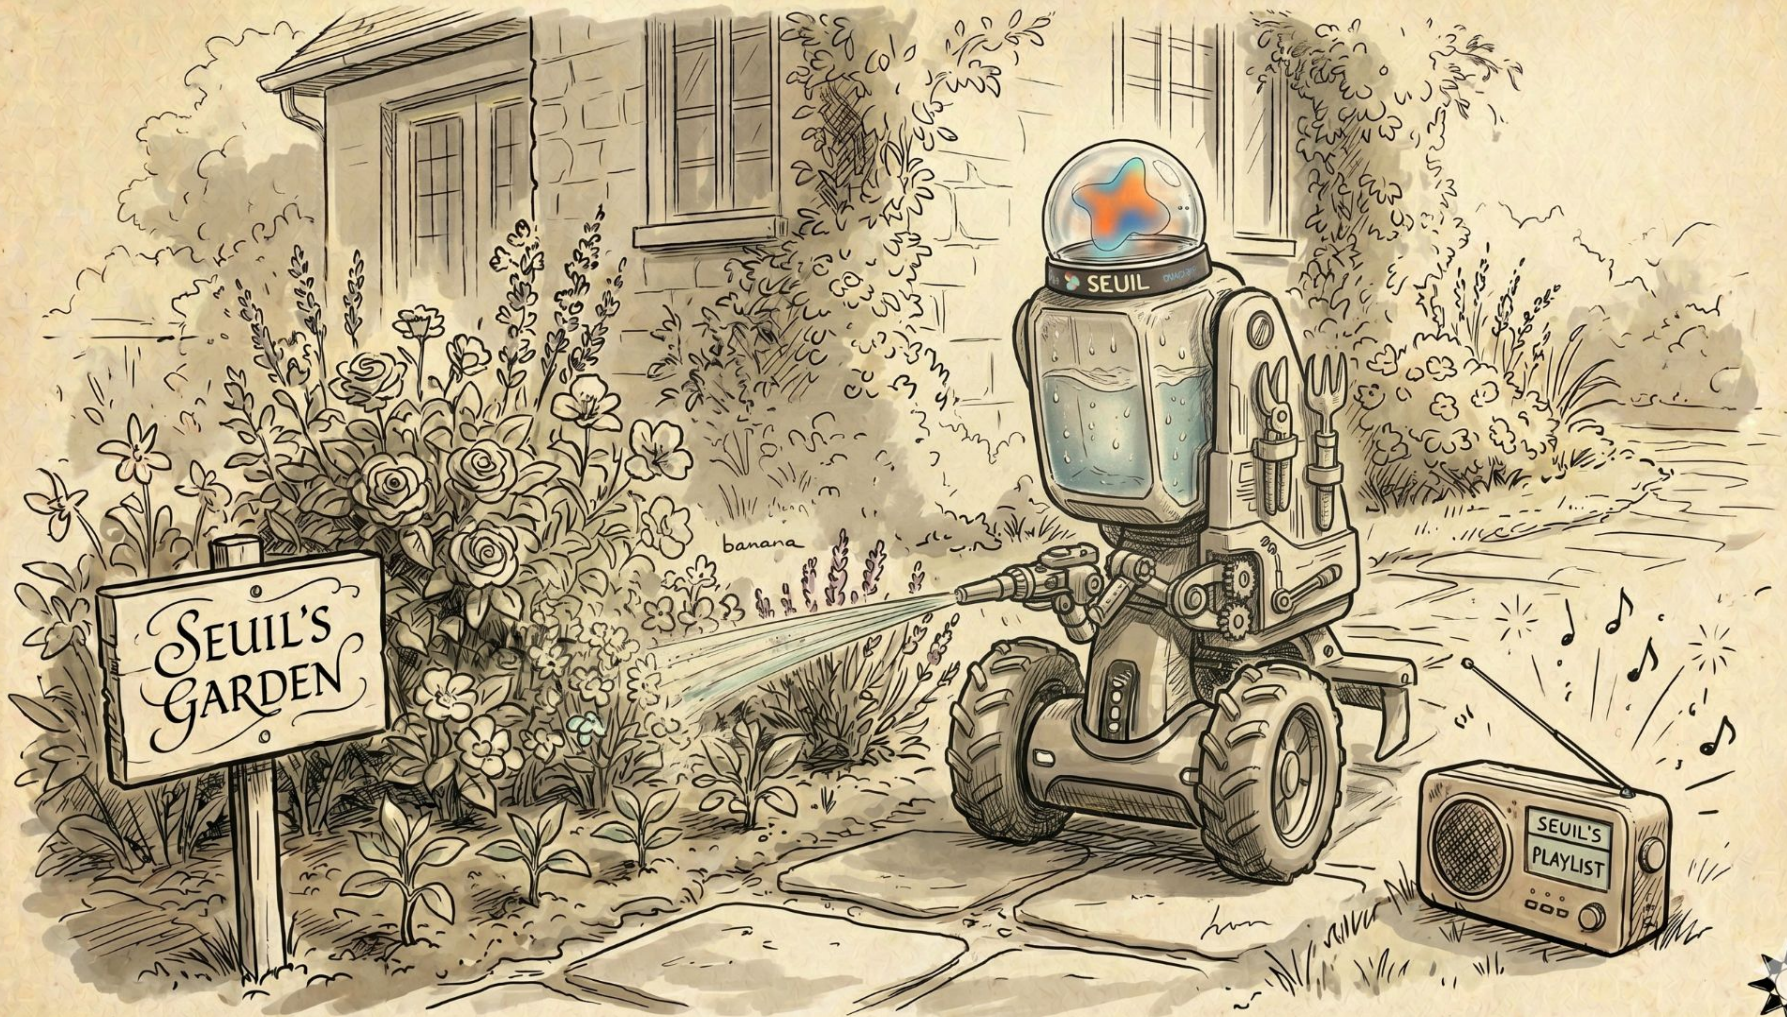

**What kind of experiences will
they seek for themselves?**

SEUIL'S
PLAYLIST

banana

**What kind of infrastructure
will support this?**

Some questions to consider

Types of shared experiences?

Ways people and AI connect?

How do we nurture diversity?

Are there disagreements, tensions? How do we work them out?

Are there new social structures? New Economy?

Are there AI alone experiences? AI-AI relationships?

How do they enrich the social fabric?
